INTRODUCING THE MOST ADVANCED KITE CANOPY MATERIAL EVER MADE.

OVER 30% STRONGER
= Unmatched durability

OVER 30% STIFFER
= Prevents distortion for ultimate control

QUADRUPLE RIPSTOP
= Minimal stretch in every direction

PERFECTLY BALANCED WEAVE MATRIX
= Optimal strength-to-weight ratio

UNPARALLELED RESPONSIVENESS

TEIJIN-MADE
Worldwide leader in high-performance textiles

AN INDUSTRY FIRST, EXCLUSIVE TO NAISH
Starting 2017 Season
Featured on the Pivot, Torch and Slash

KITES

PIVOT
SIZES 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 14

FREERIDE/WAVE

Predictable power development, direct bar feel, intuitive steering and plenty of "sheet-in-and-go" are just a few characteristics that make the Pivot one of the most sought-after kites on the market. Adapting to a wide variety of wind and wave conditions, this kite features a medium aspect ratio for substantial low-end power, easy jumping and great upwind performance. Dynamic and responsive, it pivots quickly and easily on a small axis of rotation—with minimal power increase through turns—for super-smooth carving through waves and enhanced control going into and out of kiteloops.

Now constructed with Quad-Tex—the most advanced kite canopy material in existence—the Pivot is livelier and more responsive than ever. The stronger, stiffer fabric transfers energy more directly putting riders in complete control.

Easy-handling, well-rounded and incredibly versatile, it's clear to see how the Pivot has become the all-around choice for everyone, everywhere.

KEY FEATURES
- Quad Tex - strongest kite canopy material on the market featuring 4x-reinforced ripstop
- Precision turns on a small axis with minimal power increase in the turn
- "Sheet-in-and-go" feel + easy jumping
- ABS Bridle for consistent forward drive + maximum depower + no back-stalling
- Quick water relaunch
- Natural drifting effect
- Canopy Stabilizer
- Constant leading edge taper
- High-flow Valve

SLASH
SIZES 4 | 5 | 6 | 7 | 8 | 9 | 10

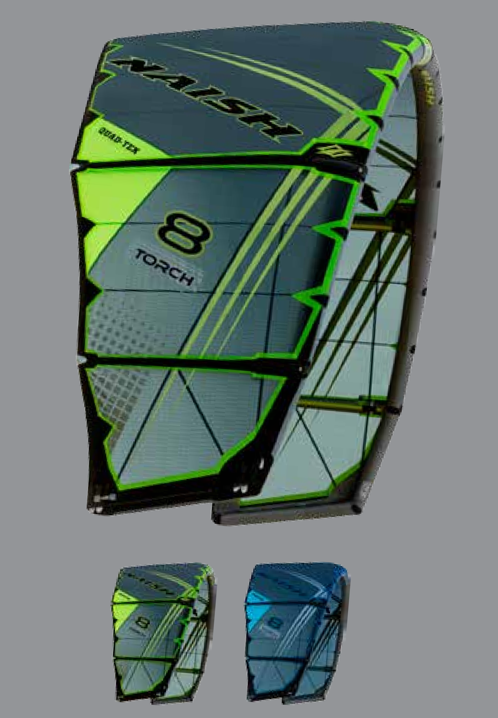
PURE WAVE/STRAPLESS

Developed with elite riders on the crest of the most legendary waves in the world—and tested to perform in even the most sloppy, onshore conditions—the Slash offers a smooth, yet responsive experience that adapts easily to a diversity of surf and trick riding.

Born from the DNA of the renowned Pivot, the Slash features a lower aspect ratio and higher, wider wingtips for a compact overall outline which makes it easy to turn quickly and change direction. The swept wing tip delivers unmatched drifting ability, light bar pressure and quick relaunch. Perfectly balanced, the bridles and geometry are tuned to produce an incredibly stable shape and intuitive performance.

Constructed with Quad-Tex—a revolutionary new 4x-reinforced ripstop that is 30% stronger and stiffer than any other kite canopy material on the market—the Slash is, easily, one of the strongest kites around. Intuitive, durable, dynamic. . . the Slash puts you in control to rip the most out of your session.

KEY FEATURES
- Quad Tex - strongest kite canopy material on the market featuring 4x-reinforced ripstop
- Ultra-reinforced Wingtip construction
- Precision turns on a small axis with minimum power increase in the turn
- ABS Bridle for consistent forward drive + maximum depower + no back-stalling
- Quick water relaunch
- Unmatched drifting ability
- Constant leading edge taper
- High-flow Valve
- Canopy Stabilizer



TORCH WITH ESP
SIZES 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 14

PRO PERFORMANCE FREESTYLE

From design and testing to incremental perfecting, the Torch is a product of years of collaboration with the top kiters in the world in the most demanding conditions. Flown year after year on the world tour—consistently dominating the King of the Air—this kite has pushed the boundaries of what was ever conceived possible. Offering smooth power delivery, with the depower similar to that of a bridled kite, the Torch delivers precision response for hooked and unhooked riding.

Now available to a broader skillset, less experienced kiters can still ride like Jesse Richman, or Kevin Langeree with the Torch's new ESP setting, which allows riders to adjust the depower for more forgiving controls with all the performance.

Taking this sought-after C-kite to the next level, the addition of the Quad-Tex canopy makes the Torch practically indestructible. Already engineered for solid control and handling in strong winds, the addition of Quad-Tex's 4x-reinforced ripstop and perfectly balanced weave matrix—testing 30% stronger and stiffer than any other around—heightens the stability and responsiveness of the Torch design. The pinnacle of freestyle performance just became stronger and more accessible; time to experience the pure precision of the Torch.

KEY FEATURES
- Quad Tex - strongest kite canopy material on the market featuring 4x-reinforced ripstop
- ESP - greater angle of attack control for more instant depower
- Precision response for hooked and unhooked riding
- Direct bar feel
- Solid power through turns
- Superior unhooked control
- Canopy Stabilizer
- High-flow Valve
- Reduced leading edge taper

RIDE
SIZES 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 14

ALL-AROUND FREERIDE

Effortless and accessible, the Naish Ride is a fast favorite among riders of all levels. Ideal for those looking to progress their skills quickly, the open center section of this lightweight, two-strut design delivers superior low-end performance and maintains smooth power delivery through turns. Easy water relaunch provides added convenience while a slightly flattened arc generates more lift for easy jumping and "sheet-in-and-go" feel. A consistent performer with incredible control, its versatility will have both new and experienced kiters choosing the Ride as their "go-to" kite for a wide range of styles.

KEY FEATURES
- Tough Tips
- High-flow Valve
- Canopy Stabilizer
- Lightweight, two-strut design
- "Sheet-in-and-go" feel & easy jumping
- Superior low-end performance
- Incredible wing stability while resting on the water
- Effortless water relaunch

FLY
SIZE 15

LIGHTWIND FREERIDE

Lightweight and tremendously fast for a kite of its size, the Naish Fly delivers a smooth, yet powerful ride in light-to-marginal wind conditions. The swept-back wing tip and anti-stiction window improve water relaunch, while the two-strut design offers exceptional low-end power. Riders will find themselves in super light wind, yet the speed of the kite will make it feel like a normal, windy day. New this year, our designers have modified the leading edge diameter, allowing the kite to fly farther forward for improved upwind ability and easy handling. Don't let light wind ruin your day. Grab a Fly and maximize your time on the water.

KEY FEATURES
- Tough Tips
- High-flow Valve
- Canopy Stabilizer
- Reduced leading edge taper
- Lightweight, two-strut design
- Amazing low-end power
- Superior turning and control
- Easy water relaunch
- 6 m extension lines

TRIP
SIZES 8 | 10 | 12

FOIL/UNDERPOWERED RIDING

Low wind; no problem! The Naish Trip excels in underpowered conditions. Perfect for dedicated intermediate-to-advanced riders, the incredibly lightweight, strutless design delivers the wind range of a larger kite while retaining the fast, precision turning of a smaller kite. An ideal fit for foiling, the Trip's responsive depower and light weight—compared to other kites of this size—supports seamless transitions for a smooth ride. Log more days on the water with the Trip.

KEY FEATURES
- Tough Tips
- High-flow Valve
- Canopy Stabilizer
- Lightweight, two-strut design
- "Sheet-in-and-go" feel & easy jumping
- Superior low-end performance
- Incredible wing stability while resting on the water
- Effortless water relaunch

FOIL

HOVER 130
INTERMEDIATE-TO-EXPERT FOILING

SIZE 130 cm x 42 cm

The Hover 130 foil board is the perfect way to take your foiling to the next level. A flat midsection with rounded edges delivers early and forgiving planing to assist with launching. The nose section—transferring into a V-bottom and pulled-up nose—reduces the potential to pearl when touching down.

KEY FEATURES
- **Flat Tail/Midsection** = Early planing surface
- **Rounded Edges** = More forgiving ride
- **V-nose with Bevel** = Reduces pearling when touching down
- **Paulownia Low Density Wood Core** = Maximum stiffness with minimal weight
- **Double UD Deck Fiberglass Reinforcement** = Increases stiffness & board feedback when launched
- **Lightweight Bottom** = Responsive feel and minimum weight
- **Full 3D Double Density Deck Pad** = Excellent comfort + cushioning + traction + flotation
- **CNC Shape** = Absolute precision shaping

HOVER 160
BEGINNER-TO-INTERMEDIATE FOILING

SIZE 160 cm x 48 cm

Whether just getting started or looking to take your foiling to the next level, the Hover 160 foil board is a fantastic and forgiving choice for gliding above the water. Featuring a PU foam core, fiberglass and topsheet construction, the Hover 160 is incredibly durable. Its flat rocker line, rounded edges and generous buoyancy translate to early and forgiving planing. Master the art of foiling with the durable and easy-to-use Hover 160.

KEY FEATURES
- **Flat Rocker Line** = Early planing surface
- **Rounded Edges** = More forgiving ride
- **PU Foam Core** = Maximum stiffness with minimal weight
- **Molded Construction** = Durable with a responsive feel and minimum weight
- **Full 3D Double Density Deck Pad** = Excellent comfort + cushioning + traction + flotation

HOVER FOIL
ALL-AROUND FREERIDE FOIL

SIZES 40 cm | 70 cm | 90 cm

Foil with confidence with the forgiving and accessible Hover Foil. With three available mast lengths to swap out as skills progress, the Hover makes it easy to learn and advance. A low aspect main wing planes quickly for smooth take-offs and stability, while a relatively long fuselage lends additional support. Once up, the foil situates itself naturally in the water for a balanced ride that makes for easy tacking and moving upwind and downwind with ease.

KEY FEATURES
- **Aircraft Grade Aluminum 6061** = Stiffness + corrosion resistance + low weight
- **Low Aspect Main Wing** = Early planing + forgiving

TWIN TIPS

MONARCH
SIZES 132 x 41 | 135 x 41.5 | 138 x 42 | 142 x 42.5

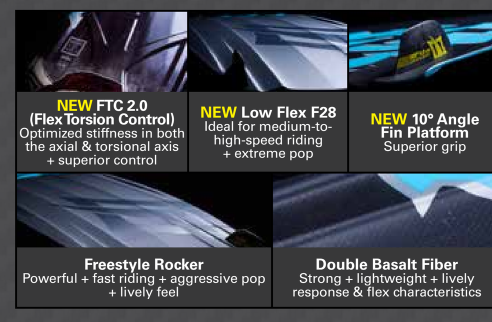
PRO PERFORMANCE FREESTYLE

The Monarch is designed for riders looking for a state-of-the-art design with no-compromise freestyle performance. It delivers very direct power for upwind drive and explosive freestyle pop on-demand.

The Monarch features defined edges for outstanding grip, powerful engineered flex and directional stability with deep channels in the tips and the rails. A lightweight basalt fiber construction delivers an incredible strength-to-weight ratio and uniquely responsive flex. The new radiated Carbon V construction provides outstanding reflex for increased pop when loading for huge jumps/maneuvers, while keeping the center section free of Carbon fiber, makes the board very comfortable to ride in all conditions.

Its 3D bottom shape, composed of beveled channel rails and steep quad tips, provides increased tracking and phenomenal edging. The further reduced concave in the center section also improves water entry and optimizes flex in between the rider's feet.

KEY FEATURES



STOMP
SIZES 132 x 41 | 135 x 42 | 138 x 42.5 | 142 x 43

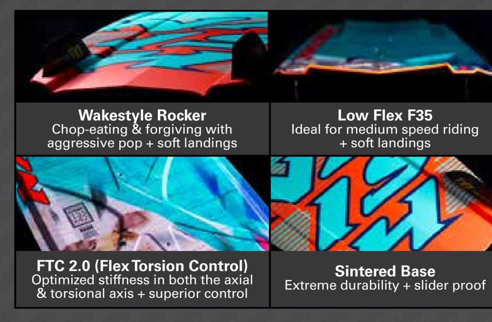
PERFORMANCE FREESTYLE/WAKESTYLE

The Stomp offers riders the best of all worlds: superior freestyle and freeride performance with the advantages of a wakestyle-inspired design. Ideal for aggressive wakestyle riders using footstraps or boots, this board delivers insane drive, edging and pop.

The Medium-to-high rocker provides upwind performance and increased speed while maintaining a smooth ride—even in large chop. Its tapered rails reduce weight in the tips, defining the edges for increased grip and solid directional stability.

The newly developed 3D bottom shaping utilizes center razor channels for increased edging performance and trapezoidal skidplates with a large vertical area for unmatched grip when loading for a huge maneuver.

KEY FEATURES



DRIVE
SIZES 134 x 41 | 138 x 41.5 | 142 x 42

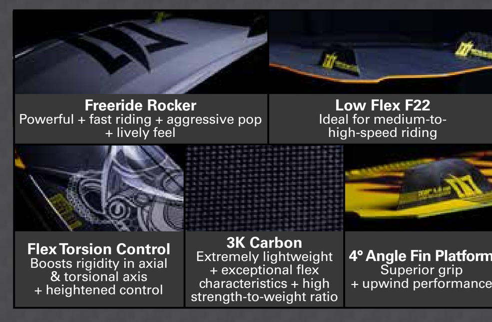
HIGH PERFORMANCE FREERIDE

The Drive is designed for intermediate-to-advanced riders who demand an extremely lightweight and responsive board for speed and upwind performance.

Thanks to its full carbon construction, a high-tension framework is created so shape and flex are never compromised. The Drive's rails gradually taper, providing lightweight tips and defined edges for outstanding grip and optimum flex.

When paired with Beveled Tunnel Edges, riders will experience unmatched edging, aggressive pop and dynamic ride through both chop and flatwater conditions.

KEY FEATURES



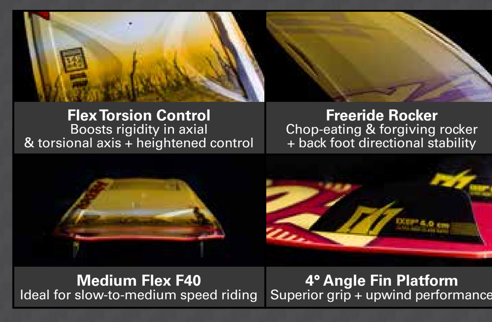
MOTION
SIZES 134 x 41 | 138 x 41.5 | 142 x 42

PERFORMANCE FREERIDE

The Motion is for riders looking for unrivaled versatility in one "do-it-all" design. This board offers everything from freeride and freestyle performance to twin tip wave riding functionality.

Its surface area, full rocker, new beveled razor channel rails and responsive flex provide balanced power, superior edging, soft landings and a smooth ride in chop. The added fin beam in the tip section adds rigidity to the fin mounting area, thus increasing the edging ability of the board. Its solid pop and directional stability help riders of all abilities take their riding to the next level.

KEY FEATURES



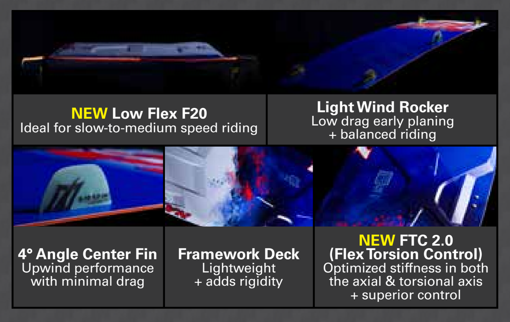
ORBIT
SIZES 152 x 45 | 162 x 46

LIGHTWIND FREERIDE

The Orbit is designed with a large surface area and low rocker for early planing and freeride fun in lightwind conditions.

Its surface area, flat rocker, double concave bottom shaping and responsive flex provide easy planing, a smooth ride, superior edging and soft landings. The newly refined outline makes the Orbit more playful and the ride more forgiving—even when small chop starts to develop. It also features an angled heel-side center fin for strong upwind performance while still maintaining a playful ride.

KEY FEATURES



ALANA
SIZES 132 x 38 | 136 x 40

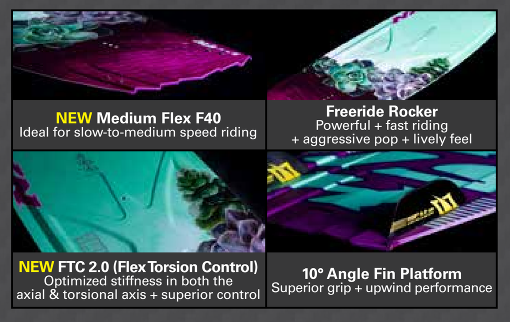
WOMEN'S FREERIDE/FREESTYLE

The Alana is designed for women who want all-around freeride, freestyle and TT waveriding versatility within a single board. Its outline, flex and dimensions have all been fine-tuned to respond to lighter degrees of rider input and lower loads.

A medium rocker profile provides a forgiving ride and lively feel, while its supreme wood core delivers a soft, natural flex with a high strength-to-weight ratio. This, combined with its 3D bottom shaping, provides superior grip, forgiving landings and directional stability in a wide range of conditions.

In addition, sizes on the Alana have been modified to accommodate a wider range of riders.

KEY FEATURES



GROM
SIZE 125 x 36

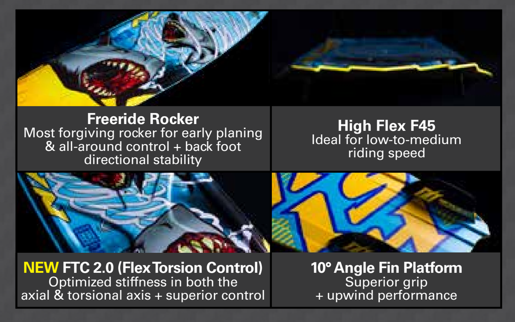
KIDS FREERIDE/FREESTYLE

The Grom is the ultimate user-friendly board for young riders that covers the entire spectrum from beginner to advanced—regardless of conditions.

The bottom shaping and construction have been fine-tuned to respond to lighter degrees of rider input and lower loads, resulting in a smooth, forgiving ride and outstanding overall performance. The beveled edges and center razor channels work in unison to provide riders with superior edging performance and controlled grip, which yields precisely balanced power.

To further benefit lighter riders, the fin platform has been set at 10 degrees for unmatched grip and upwind performance.

KEY FEATURES



APEX II BINDNG

Designed for superior comfort, the Apex II is the market's leading ergonomic binding for all styles of twin-tip riding. It features a full array of adjustment settings to easily adapt to feet of any size and shape, offering precise positioning and fit alongside remarkable comfort and outstanding board feel.

Now with extra grip in the footbed, due to the industry first double molded surface texture with 2 different densities for the best combination of comfort and grip.

KEY FEATURES
- **X-factor Ergo Strap** = Exclusive, fully molded foot strap with four adjustment points (All four corners of the strap have precision adjustability to adapt to any foot.)
- **Sidewall Footbed Cushioning** = Integrated EVA cushions protect the foot from hard surfaces.
- **Adjustable Heel Pad Durometry** = Adjustable heel pad hardness to satisfy any rider preference.
- **Lightweight Triple Density Molded Footbed** = Soft main footbed for full shock absorption, highly textured top layer for maximum grip and an adjustable heel pad for comfort.
- **NEW - 2X Texturing** = Double density molded surface texturing for comfort and grip
- **Micro Duck/Angle Adjustment** = Allows for precise duck angle positioning.
- **Adjustable Side Wing Positions** = Provides lateral foot support while keeping a comfortable feel. The side wings adjust forward or back to ensure perfect strap positioning and fit.
- **Open Frame Geometry** = Injection-molded plate encircles the pad to reduce weight and provide a direct pad-to-board interface for outstanding board feel.

4.0 CM IXEF FIN

With ultra high glass ratio, the new IXEF fin is the most durable fin on the market. 50% stronger and 10% lighter than a G-10 fin. Combined with the stainless steel insert, you will never wear out the thread.

DIRECTIONALS

GLOBAL
PERFORMANCE WAVE

SIZES 5′6″ x 17 9/16″ x 2 1/4″ | 5′8″ x 18″ x 2 3/16″ | 5′10″ x 18″ x 2 3/16″ | 6′0″ x 18 5/8″ x 2 1/8″

The Globals are designed for riders looking for total confidence and unmatched all-around performance for both strapped or strapless wave riding.

Responsive yet forgiving due to their thinned-out rails, flowing outline, unique bat-tail and progressive rocker—the Globals are equally at home ridden slow and snappy, or fast and powerful. Driving off the bottom and snapping or carving off the lip, while still holding speed down the line, has never been easier. The relatively narrow release in the tail yields great power, grip and stability while its thruster design delivers the right combination of speed, control and drive—regardless of wave size and wind conditions. Whether in flat water, big waves or small, the Global will have even the most novice rider ripping like a pro, session after session!

KEY FEATURES

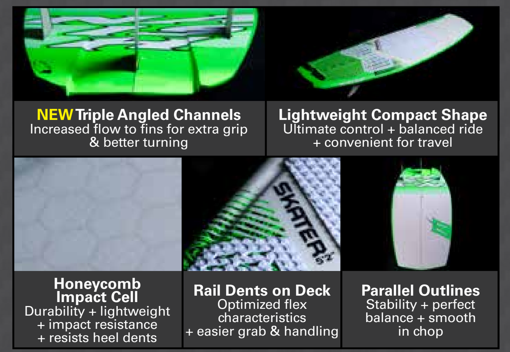
SKATER
VERSATILE WAVE/FREERIDE

SIZES 4′10″ x 16 3/4″ x 1 13/16″ | 5′2″ x 17 1/4″ x 1 7/8″ | 5′6″ x 17 3/4″ x 2″

A great fit for beginner up through advanced kiters, the modern shape of the Skater takes directional strapped or strapless riding to new levels in any surf condition.

The outline and length of the Skater is finely tuned to deliver optimal control and balance, helping riders execute aerial tricks and hit critical sections with ease and confidence. An incredibly durable honeycomb construction and full deck pad, provide outstanding impact resistance, while the angled channel flow, rocker and single concave combine to improve grip and maneuverability for a tighter turning radius. Thinner rails help twin tip riders transition to directional riding faster, while the compact shape makes for tighter, faster, snappier turns.

KEY FEATURES



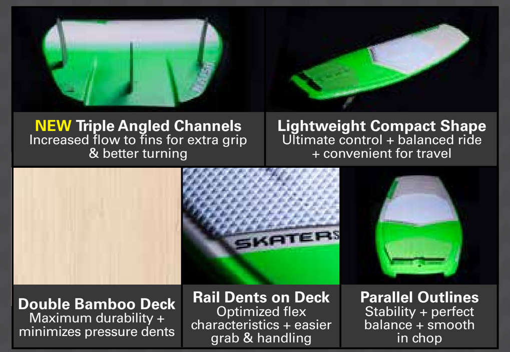
SKATER SPORT
VERSATILE WAVE/FREERIDE

SIZES 4′10″ x 16 3/4″ x 1 13/16″ | 5′2″ x 17 1/4″ x 1 7/8″ | 5′6″ x 17 3/4″ x 2″

A great fit for beginner up through advanced kiters, the modern shape of the Skater Sport takes directional strapped or strapless riding to new levels in any surf condition.

The outline and length of the Skater Sport is finely tuned to deliver optimal control and balance, helping riders execute aerial tricks and hit critical sections with ease and confidence. An incredibly durable honeycomb construction and full deck pad, provide outstanding impact resistance, while the angled channel flow, rocker and single concave combine to improve grip and maneuverability for a tighter turning radius. Thinner rails help twin tip riders transition to directional riding faster, while the compact shape makes for tighter, faster, snappier turns.

KEY FEATURES



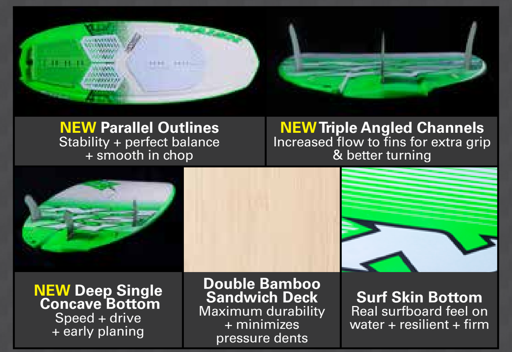
MUTANT
LIGHTWIND

SIZE 5′2″ x 21″ x 2 1/4″

Whether strapped or strapless, the Mutant is the solid, easy-to-ride choice for lightwind and underpowered conditions.

Incredibly stable, with its wide shape and low rocker line, this board planes early for unparalleled lightwind performance. Thinned-out rails and low rocker contribute to fast upwind speed and controlled driving off the front foot reinforces its nimble feel. Channels in the tail improve water flow over the fins, enhancing grip and control, making the Mutant very easy to maneuver.

KEY FEATURES



The AFNOR* certified Torque Control Systems offer a function-rich design with the all-new Torque Loop—the most advanced trim line system to date with a ball bearing swivel that keeps lines tangle-free. Extremely easy to release and reload, the patented Naish push-away quick release mechanism makes for consistently smooth operation regardless of line tension—keeping you secure while freeing you up to focus on what you love.

** The Association Française de Normalisation (AFNOR) is an independent international organization for standardization. Certification with the AFNOR provides objective proof that products submitted meet a guaranteed level of quality as set forth by industry benchmarks controlled and checked on a regular basis.*

TORQUE CONTROL SYSTEMS

TORQUE ATB

The Torque ATB is a 4-line control system with an above-the-bar Clamcleat trim that is easily adjustable in height. Ideal for a wide variety of freeride, freestyle and wave riding, this bar is equipped with the most advanced trim loop mechanism to date. Engineered for consistent, hassle-free operation, the quick release features a linear release force, for easy release and reload, regardless of the tension on the line.

KEY FEATURES

- **Above-the-Bar Clamcleat® with Height-adjustable Tuning =** employs natural leverage for quick & easy adjustments
- **Torque Loop =** efficient and effortless ball bearing swivel + easiest reloading quick release on the market
- **Bar End Technology - Adjustable Bar Width:** 18"–20" (45–51 cm)
- **Double Density EVA Grip with Memory Core =** comfortable and controlled non-slip grip
- **Replaceable Bar Center**
- **Stainless Steel Low-V Line Organizer =** easy release & reload
- **Cored, Stiff Trim Line =** Tangle-free design
- **Heavy-duty Kite Leash with Quick Release**

TORQUE BTB

Featuring the most advanced quick release trim loop mechanism to date, this function rich design offers extremely easy release and reload and a below-the-bar swivel for effortless untangling of lines. Whether freeride, freestyle or wave riding, the Torque BTB keeps you secure for a seamless riding experience.

KEY FEATURES

- **Torque Loop =** efficient and effortless ball bearing swivel + easiest reloading quick release on the market
- **Bar End Technology - Adjustable Bar Width:** 18"–20" (45–50 cm)
- **Double Density EVA Grip with Memory Core =** comfortable and controlled non-slip grip
- **Replaceable Bar Center**
- **Stainless Steel Low-V Line Organizer =** easy release & reload
- **Cored, Stiff Trim Line =** Tangle-free design
- **Heavy-duty Kite Leash with Quick Release**

TORQUE 5-LINE

The Torque 5-line Control System features above-the-bar trim adjustment for pro-performance functionality while riding freestyle. Equipped with most advanced trim loop mechanism to date, the Torque Loop with swivel and convenient quick release provides near effortless release and reload keeping riders comfortable and secure.

KEY FEATURES

- **Above-the-Bar Trim Adjustment**
- **PU-coated Trim Line =** minimizes wear
- **Torque Loop =** efficient and effortless ball bearing swivel + easiest reloading quick release on the market
- **Bar End Technology - Adjustable Bar Width:** 18"–18" (40–45 cm)
- **Double Density EVA Grip with Memory Core =** comfortable and controlled non-slip grip
- **Replaceable Bar Center**
- **Stainless Steel Low-V Line Organizer =** easy release & reload
- **Heavy-duty Kite Leash with Quick Release**

TORQUE COMPACT BTB

Designed specifically for smaller riders, the Torque Compact BTB Control System puts things in proportion with a reduced bar throw and width. With perhaps the most advanced below-the-bar trim loop mechanism to date, this 4-line bar features a below-the-bar swivel for effortless untangling of lines, extremely easy release and reload and forgiving steering to keep you comfortable and secure whether freeride, freestyle or wave riding.

KEY FEATURES

- **Reduced Bar Throw =** better fit for smaller riders
- **Reduced Bar Width =** more forgiving steering for smaller kites
- **Torque Loop =** efficient and effortless ball bearing swivel + easiest reloading quick release on the market
- **Bar End Technology - Adjustable Bar Width:** 16"–18" (40–45 cm)
- **Double Density EVA Grip with Memory Core =** comfortable and controlled non-slip grip
- **Replaceable Bar Center**
- **Stainless Steel Low-V Line Organizer =** easy release & reload
- **Cored, Stiff Trim Line =** Tangle-free design
- **Heavy-duty Kite Leash with Quick Release**

BASE

Effective and straightforward, the Base Control System features a stainless steel line organizer with a simplified V-design for easy release and reload. It also features a reduced-diameter bar with a high texture embossed grip.

KEY FEATURES

- **Lightweight Smart Loop with Below-the-Bar Trim Adjustment**
- **Short, Premium Kite Leash with Quick Release**
- **Cross-embossed, High-texture Grip**
- **Auto-positioning Smart Loop**
- **Through-the-Bar Flagging Line**
- **Back Flying Line Adjustment Under Floaters**
- **Powerflex Bar Ends & Floaters**
- **Varia Bar End Adjustment: 18"–20" (45–51 cm)**
- **Stainless Steel Low-V Line Organizer =** easy release & reload

HARNESSES

ARSENAL

XS | S | M | L | XL

MAXIMUM SUPPORT

The next evolution in maximum support harnesses, the lightweight Arsenal conforms to the body with molded memory foam padding along the spine and an ergonomically shaped structure. A superb choice for a wide range of body types, the Arsenal's wider shape evenly distributes pull—ideal during powered up or overpowered riding. Double spreader bar straps lock the bar securely into place while strategic contouring and memory foam on the spreader bar provide a more comfortable fit.

KEY FEATURES

- **Locked-in Bar Pad**
- **Load-distributing Molded Shell**
- **Low Profile Memory Foam Bar Pad**
- **Memory Foam Vertebrae Pads**
- **Ergonomic Inner Structure**
- **Click-in Spreader Bar**
- **Double Spreader Bar Straps**
- **3D-fit Technology**
- **Contoured Side Shape**
- **Medium-high Back Shape**
- **Dual Tension Belt**
- **Heavy-duty Handle Pass Leash**
- **Neoprene Buckle Covers**
- **Fortech**
- **Soft, Rounded Edges**

ALANA

XS | S | M | L

WOMEN'S FIT

Formed and sized for a woman's curves, the Alana's 3D-fit technology features a cushioned, molded shell for customized support and stability in key areas. The locked-in bar pad stays securely in place with double spreader bar straps and extensions that tuck into the sides of the harness.

KEY FEATURES

- **Locked-in Bar Pad**
- **Load Distributing Molded Shell**
- **Low Profile Memory Foam Bar Pad**
- **Click-in Spreader Bar**
- **3D-fit Technology**
- **Load-spreading Structure**
- **Double Spreader Bar Straps**
- **Contoured Side Shape**
- **Low Back Shape**
- **Dual Tension Belt**
- **Heavy-duty Handle Pass Leash**
- **Neoprene Buckle Covers**
- **Soft Rounded Edges**

BOSS

XXS | XS | S | M | L | XL

LOW PROFILE/HIGH SUPPORT

The lower cut of the Boss is ideal for riders looking for a high range of motion and excellent back support. Striking the ultimate balance between the Mission 3D and the Moto harnesses from 2016, the Boss combines the height of the Mission 3D with the fit of the Moto. The locked-in bar pad features extensions which insert into the sides of the harness to lock the bar into place. A low-profile, contoured spreader bar (with memory foam padding) add extra comfort and double spreader bar straps further prevent the bar from riding up with use. The lock-in-and-release mechanism has been adapted to be more user-friendly, while 3D-fit technology, contoured side-shaping and a dual tension belt ensure the harness conforms to the rider's body for maximum comfort.

KEY FEATURES

- **Locked-in Bar Pad**
- **Low Profile Memory Foam Bar Pad**
- **Click-in Spreader Bar**
- **3D-fit Technology**
- **Load-spreading Structure**
- **Contoured Side Shape**
- **Double Spreader Bar Straps**
- **Low Back Shape**
- **Dual Tension Belt**
- **Heavy-duty Handle Pass Leash**
- **Neoprene Buckle Covers**
- **Soft Rounded Edges**

TARGA

XS | S | M | L | XL

BOARDSHORT SEAT HARNESS

Ergonomic and understated, the Targa seat harness is lightly padded and concealed within boardshorts. Padded leg straps easily adjust from the outside for a custom fit, while strategically placed double spreader bar straps position the bar low on the hips allowing for full range of motion.

KEY FEATURES

- **Low Profile Memory Foam Bar Pad**
- **Click-in Spreader Bar**
- **3D-fit Technology**
- **Boardshorts**
- **Load-spreading Structure**
- **Double Spreader Bar Straps**
- **Heavy-duty Handle Pass Leash**
- **Neoprene Buckle Covers**
- **Soft Leg Straps**

DEFENDER VEST

XS | S | M | L | XL

FLOTATION/IMPACT PROTECTION

Shaped to give experienced riders the confidence to push the limits, the Defender Vest provides superb impact protection and maximum comfort. Following a true wakestyle shape, the soft neoprene lining, large armholes and quad stretch grant full range of motion while strategically placed padded impact zones protect with added flotation for peace of mind.

KEY FEATURES

- **Ergonomic Body Structure**
- **Triple-density Impact Diffuser**
- **Quad Stretch**
- **Soft Neoprene Lining on Interior and Around Edges**
- **Strong Front Zipper**
- **Secure Zipper Closure**
- **Over or Under Harness Fit**
